25X1

On 9 December 1954, 20 MiG-15s or U-MiG-15s were seen on the landing field at Pittstock airfield, including the alert flight of 2 MiG-15s or U-MiG-15s at the eastern end of the runway. Two radio trucks were seen at the latter aircraft. Between 11 and 19 December, there was no air activity. 1

On 10 December, 5 AA guns with outrigger-type gun mounts which had single rubber tires were seen in the southwestern corner of the field. The guns had been moved out of the emplacement. Each of the guns was surrounded by a group of 8 to 10 soldiers and 1 officer who apparently gave instructions.

The following air activity and aircraft were observed at the field between 20 December and 6 January:

20 to 26 December. There was individual local flying by MiG-15s or U-MiG-15s on 21, 23 and 24 December only.

20 December. Throughout the day until about 1800, MiG-15s or U-MiG-15s practiced individual local flying.

30 December. Until about 1400, there was air activity by MiG-15s or U-MiG-15s.

31 December to 3 January. No air activity was observed.

4 January. Throughout the day until about 2130, there was air activity by MiG-15s or U-MiG-15s.

5 January. After 1800, MiG-15s or U-MiG-15s practiced individual night flying.

25X1

6 January. No air activity was observed.¹

4. There were no changes in the status of radio or radar stations. Three motor vehicles resembling radio trucks were repeatedly seen at about the center of the landing field near the runway. One of the trucks had a rotatable antenna on its roof, shaped like a searchlight. Between 1400 and 1500 on 30 December, the Token-type radar set on Bockstaetter Berg (hill) was rotating. There was no air activity at the field during that time. 2

5. A steel frame which was painted red and white was seen south of the western end of the runway. The frame was apparently used to sound an alarm. It was observed that when a soldier struck this frame, the AA guns were then manned. 3

6. 25X1

1. Comment. Wittstock airfield is still occupied by one fighter regiment. Twenty MiG-15s or U-MiG-15s were counted on the landing field. 25X1

2. Comment. The three radio trucks were observed previously at the same place. 25X1
The rotatable antenna on the roof of one of the trucks was described for the first time as being shaped like a searchlight. The Token-type radar set on Bockstaetter Berg was repeatedly seen. 25X1

3. Comment. A hanging iron bar is a simple and effective alarm device. 25X1
